</table>
Grains of sand and other contaminants enter the horse’s alimentary tract with feed, depending on the specific environmental conditions. Some of the sand is removed with faeces, but some remains in the alimentary tract and accumulates in the intestines. This accumulated sand frequently causes colic. PECTOSyllium is a source of fibre which forms gel in the intestines that traps and binds sand grains, stones and other contaminants. Sand and stones trapped in gel are easily removed from the intestines.

Instructions for use:
For colic: administer 100 g of PECTOSyllium 2 x/day for 6 consecutive days. Once a month, administer 100 g of PECTOSyllium 1 x/day for 6 consecutive days.

To prevent for horses at risk: administer 65 g of PECTOSyllium Muesli 1 x/day, added to the feed or seeds.

Active ingredients:
Paraffinum Liquidum, Persea gratissima oil, Uva ursiﬁera seed oil, Argania Spinosa Kernel Oil, Lavandula, Arnika Montana Flower Extract, Tocopherol, Bay Laurel Oil, Limonene, Linalool.

Available container: 1,5 kg

I have been using PECTOSyllium for several years now in the practice of healing horses. It is a very effective preparation for preventing accumulation of sand, and supports the process of clearing sand deposits from the horse’s alimentary tract, which in turn prevents colic. It also acts well in long-term and resumed colic, alleviating its acute course.

**ELECTRO Horse**

**Diet feeding mixture compensating the loss of electrolytes due to excessive sweating**

**ELECTRO Horse** is an electrolyte formula supporting the supplementation of water loss and electrolyte loss observed in the horse's body during excessive activity, in hot weather conditions throughout the summer, and during periods of weakness, diarrhoea, increased body temperature, and stress connected with transportation or labour.

**ELECTRO Horse** delivers easily-absorbable carbohydrates which are a source of energy for a weakened body. Thanks to the optimally selected components, **ELECTRO Horse** enables fast supplementation of deficits, and reduces the time needed for regeneration and recovery.

**Instructions for use:**
Recommended administration period: 1 to 3 days.
Recommended dose: 25 g per 1 L of warm water. Administer after dissolving 2x/day. Provide the animal with access to clean water at the beginning of treatment since some horses need time to accept the taste and scent of the preparation.

In the case of foals, do not administer the preparation immediately after watering with milk.

**Ingredients:**
- Dextrose (glucose), sodium chloride, anhydrous magnesium sulphate, potassium chloride.
- Additives (per 1 kg):
  - Dietary additives, 5a: vitamin E (3α/7α) 300.00 mg, DL-α-tocopherol 272.73 mg; technological additives, 1b: butylated hydroxytoluene (BHT, E 321) 100.00 mg; sensory additives, 2b: mixture of aromatic substances 90.00 mg.

**Analytical ingredients and their levels:**
- Raw protein 0.0%, raw fibre 0.0%, oils and raw fats 0.0%, raw ash 28.4%, sodium 7.08%, potassium 2.08%, lysine 0.00%, methionine 0.00%, magnesium 1.08%, HCl-insoluble ash 0.77%, humidity 7%.
- Chloride content: 15.83%.
- Carbohydrate content: dextrose.

**Available container:** 1.5 kg

---

**BIOTIN Horse**

**Complementary feed Enhances the strength and health of horse’s hooves**

**BIOTIN Horse** provides elements, which contribute to the rebuilding of healthy hooves and shiny hair. It ensures proper formation of the hooves, increases their hardness and flexibility. The product contains high level of biotin and copper together with zinc and methionine in the form of chelates.

**Instructions for use:**
Mix **BIOTIN Horse** with the feed.
- Adult horses: 10 g / day.
- Foals: 5 g / day.

Note: The treatment period is long due to the fact that the hoof rebuilds from the top.

**Ingredients:**
- Biotin 2000 mg, zinc 2000 mg, methionine 8000 mg, copper 1000 mg.
- Additives (in 1 kg):
  - Dietary additives, 5a: vitamin E (3α/7α) 300.00 mg, DL-α-tocopherol 272.73 mg; technological additives, 1b: butylated hydroxytoluene (BHT, E 321) 100.00 mg; sensory additives, 2b: a mixture of aromatic substances 90.00 mg.

**Analytical ingredients and their levels:**
- Raw protein 10.1%, raw fibre 0.0%, ash 12.1%, raw fibre 18.6%, sodium 0.0%, lysine 0.2%.

**Available container:** 1 kg
DERMASEPT Gel

Skin preparation

An innovative product intended for use on injured tissue in the event of sallenders and malanders, supporting the natural processes of skin reconstruction and regeneration.

It is formulated on the basis of the latest knowledge in the field of biotechnology, using silver and copper nanocolloids. The addition of tea tree oil forms a protective layer which protects the affected areas against re-infection.

Eosin and allantoin contained in the preparation actively support healing processes and the regrowth of hair at the point of damage.

DERMASEPT Gel promotes the formation of a natural barrier preventing the re-entry of fungi and mould.

It quickly penetrates into the deep layers of skin, is safe, and does not cause burning sensations.

Instructions for use:

Before applying the gel, skin should be thoroughly cleansed of scabs. Apply the preparation to the clean, damaged skin.

Ingredients:

Non-ionic nanoparticle colloidal silver, non-ionic nanoparticle colloidal copper, tea tree oil, propolis, allantoin, eosin, glycerine, thickener, demineralised water.

Available container: 500 g

DERMASEPT Gel preparation was formulated from the need and willingness to help in the fight against the difficult and often reoccurring conditions of sallenders and malanders.

Sallenders and malanders are conditions that affect horses of all ages, so DERMASEPT Gel has been formulated in such a way that it is safe for adult horses, pregnant mares and foals. It is a product that does not contain an antibiotic and can therefore be successfully used for long periods without causing drug-resistance.

In chronic sallenders and malanders, using DERMASEPT Gel systematically for between 4 and 6 weeks is perfect for complete regeneration of healthy skin without lumps, which is resistant to cracking and abrasion. Eosin which dyes the places attacked by sallenders and malanders red and nano-silver are present in the preparation and ensure rapid clearance of Dermatophilus congolensis bacteria which cause sallenders and malanders.

The presentation of DERMASEP Gel is available on our website www.over-horse.pl and our Facebook profile www.facebook.com/over.horse

RANSEPT Gel, Spray

Wound-healing, stimulating preparation

RANSEPT stimulates the healing of skin defects and the skin’s regeneration. It is effective in the healing of various wounds such as cuts, abrasions and chafes (e.g. abrasions and chafes of the withers).

It contains a patented, nanomolecular silver colloid which reduces the risk of bacterial and fungal growth.

RANSEPT does not cause irritations and allergic reactions. Allantoin reduces the risk of inflammation and stimulates the growth of granulation tissue, thus the preparation is great for lacerations, where healing is possible only via the growth of granulation tissue.

The preparation is safe for young horses.

Instructions for use:

Apply RANSEPT by smearing or spraying onto the lesion. Repeat 2-3 times/day until complete elimination of symptoms.

Ingredients:

Eosin, non-ionic nanomolecular colloidal silver, allantoin, glycerine, thickening agent, demineralised water.

Available containers: RANSEPT Gel 250 g

RANSEPT Spray 500 ml
FUNGISEPT Gel, Spray

Preparation for equine dermatomycosis

FUNGISEPT is the latest preparation supporting the treatment of dermatomycosis. It contains an extremely effective, patented nanomolecular copper colloid with a growth-reducing effect on various fungi. Its use supports the regeneration of skin and hair growth.

FUNGISEPT is enriched with tea tree oil and bee glue (propolis) which protects lesions against secondary bacterial infections and supports healing processes.

FUNGISEPT does not cause skin irritation, acts like a natural antibiotic, and strengthens the skin's immune system.

The preparation is safe for young horses.

Instructions for use:
Apply FUNGISEPT by smearing or spraying onto the lesion. Repeat 2-3 times/day until complete elimination of symptoms.

Ingredients:
Non-ionic nanomolecular colloidal copper, tea tree oil, bee glue, solubilizer, thickening agent, demineralized water.

Available containers: FUNGISEPT Gel 250 g
FUNGISEPT Spray 500 ml

HOTACTIVE Horse

Warming ointment with camphor

Warming ointment for use before training and in the event of injuries to horses. Massage action while applying the preparation works on the basis of reflexes and leads to vasodilatation, increasing the temperature in a specific area of the body. The ointment perfectly seals capillaries.

Muscle spasms caused by insufficient warming-up gradually loosen, and the physical condition of the horse significantly improves. Muscles become visibly relaxed.

Instructions for correct use:
Use the product on clean skin and hair. Rub the ointment deeply in while massaging a given area.
Use each time before training and for injuries.

Ingredients:
Camphor, peppermint, propolis.
Available container: 500 g
MENTHOL Gel

Cooling gel with eucalyptus extract

MENTHOL Gel is a very effective cooling gel, which should be applied directly after exercise on the load-bearing muscles, tendons and joints.

Thanks to the specially selected mixture of essential oils and plant extracts, MENTHOL Gel has a strong cooling effect, and reduces pain and the risk of inflammatory conditions.

The addition of menthol reduces swelling and helps tissue regeneration.

The preparation alleviates the effects of insect bites.

Instructions for use: Apply after intensive exercise on load-bearing muscles, tendons and joints.

In the case of injuries, use large volumes 2-3 times a day for 3-5 days.

Ingredients: Japanese mint oil, eucalyptus oil, chestnut tree extract, arnica extract, menthol, glycerine, additives, dye.

Available container: 500 g

SANI Creme

Soothing cream for abrasions

Preparation for external use.

Designed for use on skin in areas exposed to abrasions under the saddle and girth. Due to the high concentration of calendula, it soothes and has a calming effect on affected areas. It actively supports epidermal regeneration. It creates a protective film on the surface of a wound to shield it from impurities. The product is quickly absorbed and leaves no greasy spots.

The pleasant fragrance is tolerated by horses.

Instructions for correct use: Use the product on clean skin and hair. Rub the ointment deeply in while massaging a given area.

Use each time before training and for injuries.

Ingredients: Calendula flower extract, paraffin oil, emollients, emulsion base, dye.

Available container: 450 g
**BRONCHI Equus**

**Supplementary feeding mixture**

**BRONCHI Equus** is a preparation with protective and supportive actions on the respiratory tract. The carefully selected composition of 5 herbs and organic acids alleviates irritations of the upper respiratory tract, and inhibits the growth of fungi and bacteria. When administered during periods of enhanced activity of pathogens in the respiratory tract, it support immunity and protects the mucosa of the throat and larynx.

Due to the use of Eucalyptus purpurea, it reduces the risk of inflammation and has an expectorant effect. At the same time, the preparation supports the treatment of pulmonary infections such as bronchitis or pneumonia.

The preparation is especially recommended during colds, influenza, bronchitis and pneumonitis.

**Instructions for use:**

- **Mares after foaling:** 50 ml/day with feed during lactation period and 1 month after.
- In the case of post-delivery reclining of the mare, administer 200 ml just before delivery and then 24 hours after delivery.

**Foals:** each day after weaning until the conclusion of ossification (growth completion) – 50 ml/500 kg b.w.

**Ingredients:** Pentosan, sodium chloride.

**Additives (per 1 kg):**

- Process additives, 1a: formic acid (E236) 2.04 g/kg, acetic acid (E260) 1.82 g/kg, lactic acid (E270) 1.06 g/kg, sensory additives, 2b: Thymus vulgaris, Echinacea purpurea, Thasiao logos folium, Eucalyptus globulus, Pimpinella anisum.

**Analytical ingredients and their levels:**

- Raw protein 0.20%, raw fat 0.20%, raw fibre 0%, raw ash 0.10%, sodium 1%, methionine 0%, cystine 0%, humidity 98%.

**Available packaging:** 1000 ml (single pump application: 5 ml)

---

**CALCI Cavalo**

**Supplementary feeding mixture**

**CALCI Cavalo** is a calcium preparation for reducing the risk of the development of calcium deficits in lactating mares and foals after weaning. The preparation delivers highly-absorbable calcium, absorption of which is enhanced by vitamin D₃. **CALCI Cavalo** also provides phosphorus and magnesium, due to the fact that calcium balance disorders are often connected with hypophosphatemia and hypomagnesemia.

The preparation allows maintaining of normal calcium levels, and thus supports the growth of healthy, strong bones in young horses. It supports the functioning of the nervous system, and reduces the risk of complications caused by calcium deficits in lactating mares. The preparation is especially recommended for lactating mares, and foals after weaning.

**Instructions for use:**

- **Mares after foaling:** 50 ml/day with feed during lactation period and 1 month after.

In the case of post-delivery reclining of the mare, administer 200 ml just before delivery and then 24 hours after delivery.

- **Foals:** each day after weaning until the conclusion of ossification (growth completion) – 50 ml/500 kg b.w.

**Ingredients:** Glycerine, calcium chloride, propylene glycol, magnesium chloride, anhydrous diammonium phosphate, lactose.

**Additives (per 1 kg):**

- Dietary additives, 3a: nicotinic acid (niacin) 15 g, calcium pantothenate 10 g, vitamin E (3a700) 2500 mg, vitamin D₃ (3a670a) 2500 IU, pantothenic acid 190 mg, vitamin B1 180 mg, vitamin B6 (3a831) 170 mg, vitamin B2 165 mg, vitamin B12 600 µg, 3b: cobalt (Co; cobalt sulphate dihydrate; E 3) 105 mg; technological additives, 1a: hydrated trisodium citrate (E 331) 75 mg, lactic acid (E 270) 20 mg; sensory additives, 2a: sunset yellow (E 10), 2b: aroma blend.

**Analytical ingredients and their levels:**

- Raw protein 0%, raw fibre 0%, oils and raw fats 0%, raw ash 6.3%, sodium 0%, calcium 0%, phosphorus 0.025%, magnesium 0.5%.

**Total calcium content:** 5.21%.

**Available container:** 1000 ml (single pump application: 5 ml)

---

**Supplementary feeding mixture**

**BRONCHI Equus** is a preparation with protective and supportive actions on the respiratory tract. The carefully selected composition of 5 herbs and organic acids alleviates irritations of the upper respiratory tract, and inhibits the growth of fungi and bacteria. When administered during periods of enhanced activity of pathogens in the respiratory tract, it support immunity and protects the mucosa of the throat and larynx.

Due to the use of Eucalyptus purpurea, it reduces the risk of inflammation and has an expectorant effect. At the same time, the preparation supports the treatment of pulmonary infections such as bronchitis or pneumonia.

The preparation is especially recommended during colds, influenza, bronchitis and pneumonitis.

**Instructions for use:**

- **500 kg horses:** 50 ml/day for the first 10 days, 25 ml/day for the following 20 days.
- **Foals:** 10 ml/2x day for the first 10 days, 15 ml/day for the following 20 days.

In adult horses, the preparation is sufficient for 30 days of treatment, in foals – for 60 days of treatment.

Administer the preparation with feed, drinking water or directly into the mouth.

**Ingredients:** Pentosan, sodium chloride.

**Additives (per 1 kg):**

- Process additives, 1a: formic acid (E236) 2.04 g/kg, acetic acid (E260) 1.82 g/kg, lactic acid (E270) 1.06 g/kg, sensory additives, 2b: Thymus vulgaris, Echinacea purpurea, Thasiao logos folium, Eucalyptus globulus, Pimpinella anisum.

**Analytical ingredients and their levels:**

- Raw protein 0.20%, raw fat 0.20%, raw fibre 0%, raw ash 0.10%, sodium 1%, methionine 0%, cystine 0%, humidity 98%.

**Available packaging:** 1000 ml (single pump application: 5 ml)

---

**Available packaging:** 1000 ml (single pump application: 5 ml)
HorseFly Spray

Active insect repellent

HorseFly Spray contains a special composition of essential oils with a pleasant scent, which successfully repel flies, mosquitoes, ticks, black flies and other flying insects.

The preparation remains active for approx. 5-7 hours in the pasture.

Due to the use of natural substances it is non-toxic, does not cause allergic reactions or hair discolouration, and does not irritate skin. Glycerine has a conditioning effect.

Its use is also safe for foals.

Does not contain pesticides!

Instructions for use:
Spray several times on body parts exposed to insects. Repeat if necessary. Avoid contact with eyes and nostrils.

Note: The time of effective action is reduced during intensive exercise.

Ingredients:
A mixture of natural essential oils (orange, lemon, geranium, tea tree), denaturated ethyl alcohol, isopropyl alcohol, glycerine, solubilizer, surfactant, EDTA, preservatives, water.

Available container: 650 ml

CHEVAL Silk

Preparation supporting the combing of mane and tail hair

CHEVAL Silk is an exclusive preparation for horses which supports combing of mane and tail hair.

Natural plant waxes in the preparation effectively nourish and smooth hair. Thanks to this, hair is not pulled out when combing. After application on mane and tail, the hair is shiny but not greasy.

CHEVAL Silk maintains good hair condition, does not over-dry it, and has an antistatic effect.

CHEVAL Silk has a natural pH and causes no irritation.

Instructions for use:
Apply the preparation during each combing of mane and tail. Spray on hair using the atomizer, wait a while and comb.

Ingredients:
Aqua, cetyl alcohol, cetearyl alcohol, stearammonium chloride, PEG-20 stearate, polyquaternium-7, citric acid, parfum, methylchloroisothiazolinone, methylisothiazolinone.

Available container: 650 ml
DARK HORSE Shampoo

Specialised, colour-intensifying shampoo for horses with black and dark coats. Natural ingredients used in the shampoo, such as henna extract and walnut shells, bring out the black and restore the glow of dark coats. In addition, due to cashmere wool proteins the preparation perfectly nourishes hair and gives it a deep, dazzling appearance. It also has antistatic properties. The product is based on mild cleansing substances which do not irritate the skin when carefully washing and moisturising it. The shampoo does not contain salt, and can be used for horses with sensitive skin.

The shampoo matches the natural pH level of skin.

Instructions for correct use:
For baths: dissolve 50 ml of shampoo in a bucket of lukewarm water. Spread evenly on skin, mane and tail with a sponge, gently massage the lather in, rinse thoroughly with water.

Be sure to avoid the areas around the eyes and mucous membranes. Repeat the procedure as often as necessary, but always bear in mind the horse's health (with regard to the conditions and temperature for the horse after the bath).

Active ingredients:
Cashmere proteins, henna extract, walnut extract, essential oils (tea tree, geranium, lemon, orange).

Available container: 1 litre (single pump application: 5 ml)

WHITE HORSE Shampoo

Shampoo for fair coats

Shampoo with a unique composition, designed for horses with fair coats. It includes such outstanding ingredients as silk proteins, amber extract and organic lemon extract. Silk proteins preserve water on the surface of hair, and ensure hair is beautifully arranged with a healthy, shiny appearance. Amber extract strengthens hair roots and protects against harmful UV rays. Organic lemon extract helps maintain the fair colour of the coat. In addition, vitamin C and flavonoids protect the hair against oxidation.

The shampoo does not contain salt (sodium chloride), so the delicate horse skin is not irritated.

The shampoo matches the natural pH level of skin.

Instructions for correct use:
For baths: dissolve 50 ml of shampoo in a bucket of lukewarm water. Spread evenly on skin, mane and tail with a sponge, gently massage the lather in, rinse thoroughly with water.

Be sure to avoid the areas around the eyes and mucous membranes. Repeat the procedure as often as necessary, but always bear in mind the horse's health (with regard to the conditions and temperature for the horse after the bath).

Active ingredients:
Amber extract, lemon extract, silk proteins.

Available container: 1 litre (single pump application: 5 ml)
**PROTEIN HORSE Shampoo**

Luxury shampoo designed for the daily care of horse skin and hair. The ingredients in the shampoo have cleansing properties for the skin and hair, improve hair condition, and prevent excessive exfoliation of the epidermis. Silk proteins preserve water on the surface of the hair and ensure hair is beautifully arranged with a healthy, shiny appearance. The shampoo regulates the activity of the sebaceous glands and sweat glands. Wheat proteins regenerate the coat and prevent brittleness.

Organic honey extract has strong moisturising and conditioning properties. It also protects hair from the harmful effects of UV radiation.

The shampoo matches the natural pH level of skin.

**Instructions for correct use:**

For baths: dissolve 50 ml of shampoo in a bucket of lukewarm water. Spread evenly on skin, mane and tail with a sponge, gently massage the lather in, rinse thoroughly with water.

Be sure to avoid the areas around the eyes and mucous membranes. Repeat the procedure as often as necessary, but always bear in mind the horse’s health (with regard to the conditions and temperature for the horse after the bath).

**Active ingredients:**
- Honey extract
- Wheat proteins
- Silk proteins

**Available container:** 1 litre (single pump application: 5 ml)

---

**SULFUR HORSE Shampoo**

Specialised care shampoo for the hair and skin of horses with skin problems. It is based on natural essential oils.

It gently cleanses, nourishes and conditions the hair, thereby allowing it to maintain its healthy appearance. The presence of bio sulfur regulates the process of epidermal regeneration.

The shampoo also contains a unique zinc-based component which has a soothing, calming effect, reducing the sensation of itching.

The shampoo matches the natural pH level of skin.

**Instructions for correct use:**

For baths: dissolve 50 ml of shampoo in a bucket of lukewarm water. Spread evenly on skin, mane and tail with a sponge, gently massage the lather in, rinse thoroughly with water.

Be sure to avoid the areas around the eyes and mucous membranes. Repeat the procedure as often as necessary, but always bear in mind the horse’s health (with regard to the conditions and temperature for the horse after the bath).

**Active ingredients:**
- Sulfur, essential oils (tea tree, geranium, lemon, orange).

**Available container:** 1 litre (single pump application: 5 ml)
OVER HOOF Oil

Hoof care oil

High quality oil for the care of hooves. The product gives hooves a healthy appearance, eliminates their excessive fragility. Natural oils and extracts included in the product nourish the hoof and reduce its roughness.

Active ingredients:
- Lanolin – emollient, lubricates and protects the hoof, reduces its roughness.
- Avocado oil – nourishes, increases flexibility and eliminates the feeling of roughness, effectively soothes irritation.
- Arnica – disinfectant, extract rich in essential oils and flavonoids.
- Laurel oil – supports the treatment of dermatological ailments, is antiseptic and anti-inflammatory, disinfects.

Instructions for use:
Apply the oil directly on the cleaned hoof using a brush attached to the package. The brush allows easy and effective application of the product.

Active ingredients:
- Paraffinum Liquidum, Persea gratissima oil, Vitis vinifera seed oil, Argania Spinosa Kernel Oil, Lanolin, Arnika Montana Flower Extract, Tocopherol, Bay Laurel Oil, Limonene, Linalool.

Available container: 600 ml

CLEAN WHITE Shampoo

Dry shampoo for grey horses

A preparation, which removes the stains from the coat, frees the hair from sediment and dirt. Due to natural cleansing ingredients, it leaves a clean and soft coat. The product does not require rinsing, is very easy to use. Recommended especially for for grey horses. It contains hydrogen peroxide.

Active ingredients:
- Lactic acid – moisturizing agent, supports the moisturizing effect of the coat, improves the hair structure, demonstrates mild discoloring properties, is antibacterial.
- D-panthenol – excellent moisturizing component, providing softness and elasticity, does not irritate, does not sensitize, is soothing and anti-inflammatory, smoothes and thickens the hair fiber, gives the hair shine, facilitates combing.

Instructions for use:
Spray the dirty coat with the shampoo. Leave for approximately 1 minute, then wipe with a clean cloth or sponge. Repeat if necessary.

Active ingredients:
- Aqua, Cocamidopropyl Betaine, Lactic acid, Hydrogen peroxide, Panthenyl Ethyl, Parfum, Methylchloroisothiazolinone, Methylisothiazolinone.

Available container: 400 ml
CABI Glue

Gel for treatment of hoof diseases and hoof care

CABI Glue is an innovative gel for the preventative care of unkempt hooves in horses standing on wet ground, and for use during the treatment of disorders such as thrush and canker.

The effectiveness of CABI Glue is based on the action of chelates of copper and zinc, reducing the risk of bacterial and fungal development, protecting the sole against putrescent processes, and increasing the hardness of the horn while protecting against dryness.

Organic acids contained in CABI Glue prolong the effect of minerals and prevent the binding of pathogenic bacteria and fungi from the ground with the preparation.

Thanks to the use of minerals in chelate form, these show a higher availability than their mineral equivalents.

Instructions for use:
CABI Glue should be used on cleaned and dry hooves in the area of the sole and sole groove. Release the animal only after the gel has dried.

In the case of thrush and canker, put an adequate amount of gel into the tissue deficits and seal with BLUE tape.

CABI Glue should be used each time after hoof correction to cover the post-procedural micro-deficits, especially in the area of the sole and sole groove, protecting against pathogenic bacteria.

Ingredients:
Copper chelate, zinc chelate, organic acids.

Available container: 300 g

CABI Spray

Liquid for treatment of hoof diseases and hoof care in spray form

CABI Spray is designed for spraying onto the hooves in the area of the sole and its groove, and in the treatment of disorders such as thrush and canker. It reduces the risk of the development of bacteria, fungi and inflammatory conditions, and hardens and regenerates the horn.

Organic acids contained in CABI Spray prolong the effect of minerals and prevent the binding of pathogenic bacteria and fungi from the ground with the preparation.

Thanks to the use of minerals in chelate form, these show a higher availability than their mineral equivalents.

Instructions for use:
CABI Spray must be used each time after hoof correction to cover the post-procedural micro-deficits, especially in the area of the sole and sole groove, protecting against pathogenic bacteria.

Ingredients:
Copper chelate, zinc chelate, organic acids.

Available container: 500 ml
urine FREE HORSE

Bioenzymatic urine and other organic stains remover

urine FREE HORSE is a fast-acting, microbial cleaning agent. It removes the urine stains and the odor of urine, faeces, sweat and any other permanently. Thanks to the natural formula, it is safe and environmentally friendly.

Usage:
- trailers, horseboxes;
- stable, tack room;
- blankets, saddle pads.

Instrukcja prawidłowego stosowania:
Shake before use. Test for colour fastness.

Hard surfaces, matrasses, mats: visible urine remains wipe with a paper towel. Spray the product on the surface and allow it to dry. Do not rub, do not wipe. After the stains and odor are removed, rinse thoroughly to make sure that the dirt disappeared. In case of old stains, it is necessary to repeat all the steps every day until the stains disappear.

Clothes: spray urinefree on the stained surface. Leave for 15 minutes (or overnight - in the case of very troublesome stains). Wash as usually, without prior soaking. Urine and its residue will be removed during washing and rinsing.

NOTE:
Do not spray on people and animals. Do not use as air freshener. Avoid contact with eyes, skin and open wounds. Store out of the reach of children.

First aid:

Active ingredients: <5% nonionic surfactants, bacteria, perfume.

Available containers: 750 ml, 5 l
